

# Networked Improvement Community

*Collaborating for Student Success*

## What is a NIC?

A Networked Improvement Community brings together teachers across grade levels, content areas, and support services to solve shared problems of practice and improve outcomes for all students.

## Our Purpose

Teams define a clear aim—such as improving reading and math fluency—and use data to guide small, measurable changes across classrooms.

## Who's Included?

General education • Art • Music • PE • ESL • Special Education  
All teachers collaborate to align instruction, student engagement, and support strategies.

## Why It Matters

NICs replace isolated efforts with collective learning. Every teacher contributes insights to improve outcomes for all students. Together, we're stronger!
